

RESULTING FROM PROFESSIONAL EXPERIENCE

**NEW
Innovation!**

**PBT-
Vibrating Base**

TECHNICAL DATA

Area of Application

To fill and compact by vibration with quartz sand while bending hollow profiles out of aluminium, steel and stainless steel.

Movability

The weight and design allow easy implementation of the vibrating base anywhere in the workshop.

Features

- Ready to operate
- Easy handling
- Transportable

Dimensions

340 x 340 430 mm (L x W x H)

Weight

38 kg

Voltage

230 Volt 50 Hz

Noise emission

80 dB

Load

Weight of profile including sand filling
max. 130 kg
